## Description:

**Annihilation Strike?**: No.

**Description**: Length, 25' Height: 6", Weight: 1,350 Lbs., Fur color: White, Eye color: Light-blue white, Eye shape: Small rounded., Posture: As a Snake.

**Dislikes**: Fire.

**Disposition**:

**Fears**: Fire.

**Habitat**: Arctics.

**Immunities**: Poison.

**Life-span**: 60 years..

**Likes**: Any type of living creature.

**Needs**: Unknown.

**Note**: The Giant Snake is the most intelligent and meanest of all snakes. It will surprise attack any creature that does not successfully make its avoidance-roll vs. "Awareness". It is covered with a pure white fur that resists even a dragons cold breath. Its eyes are light blue-white. Unlike the Giant Cobra this snake will go out of its way to kill something. Its metabolism demands food quickly as its energy eats it up in just an hour after swallowing something. This puts the Fur Snake in a - forever - hunting mood that drives it on for the kill. Fur Snakes have been known to starve to death, though only in a few rare instances. The Fur snake is not a reptile. It is a warm blooded mammal that bears its young similar to the way Humans do. Also, it is important to note that a Fur Snake has no fangs. It has teeth like the Moray eel, or the piranha fish; Cutting, razor sharp edges.

**Special Abilities**: None.

**Special defenses**: None.

**Special offenses**: Extremely toxic venom that only has to touch the skin to kill. If a creature is not wearing armor - or if the damage from the bite brings the armor points down to zero - the poison, before it dries on the clothing, if the creature bitten has not taken flesh damage, will have a 30% chance for the poison to make contact with the skin and kill it one turn after being bitten.

**Susceptibilities**: None.

**Weapon susceptibility**: Rank-0 (non-magical) weapon to harm.
