

BoneRoot

The following is the information concerning this organic plant:

Appearance

BoneRoot grows and forms within the contour of the rock or stone it is between. It smooths the stones edges and continues to grow smooth and solid. This root is as solid as adamantium-steel.

% chance to locate per 24 hours: 2%

of checks per 24 hours: 2

Classification: Root.

Color: Milk-white.

Location: Within cavities and cracks in solid rock and stone.

Maturity: 300 years. Before maturity, BoneRoot doesn't have the power to increase the potency of Necromancer spells. At 300 years

BoneRoot grows no larger. If plucked before maturity, it is ruined.

Regional habitation: Underworld.

Smell: Smells like the rock it is growing on.

Uses found: 1

Value per use: 800 black-gold

Taste: Tastes like ivory, with a very slight acidic after taste.

Texture: Smooth and hard.

Explanation

This steel-hard root is a very rare and powerful form of organic life. Its power to increase Necromancer-based spells is invaluable.

To tell if BoneRoot is mature and ready to pick, the Necromancer must cast a spell while touching it. If the power of the spell is increased, the root is ready for harvest.

Once BoneRoot is secured, it does not fade, or be consumed, by the casting of a single spell. This will be a permanent spell component forever.

Area of influence: Increases the power of Necromancer spells.

Damage: None.

Duration of effects: Not applicable. BoneRoot does not increase the duration of a spell; it increases the power of spells.

Effect time: Not applicable.

Effects: BoneRoot will increase the power of Necromancer spells by 20-50% (roll 1-D4 +1 x10).

Healing: None.

Immunities: None.

Maximum adjustments:

Overdose symptoms: None.

Range of influence: Increases the power of Necromancer spells.

Resting time: None.

Side effects: None.

Used for: Necromancer spells.

Preparation

Merely have this root on person (doesn't need to actually touch the caster's skin).

Avoidance-roll: None.

Measurement per use: At it's maturity, BoneRoot will be about the size of an average carrot, yet twisted and gnarled.
