

# Coullip

The following is the information concerning this organic plant:

# Appearance

Each small stem on this plant has the, almost exact, appearance of a newly sprouted pine needle, each being about 1" in length at full maturity.

% chance to locate per 24 hours: 15%

# of checks per 24 hours: 2

Classification: Herb.

Color: Light-green, pale-green to white about the edges.

Location: Surface.

Maturity: 21 days.

Regional habitation: Forest.

Smell: Slightly sweet with a hint of green (like the smell of green grass).

Uses found: Each Coullip Herb has 9-24 stems (roll 3 D-6+6). There will be 1-D6 (roll 1 D-6) Coullip found in one area.

Value per use: 1 silver.

Taste: Slight pine taste.

Texture: Very similar to the new, green, pine needle growths on pine trees in the spring.

# Explanation

This herb is still useful dried and packed away, though it will take four uses (stems) instead of the normal one.

**Area of influence:** Chest and throat. Coullip tea soothes severe coughs and reduces the pain in the chest and throat area.

**Damage:** None.

**Duration of effects:** 8 hours.

**Effect time:** 120 to 180 turns (10-15 minutes).

**Effects:** Relieves coughing, due to damaged through, burnt lungs, and/or sickness and disease.

**Healing:** Causes coughing to cease 90%, thus reducing chest and throat soreness caused by constant coughing.

**Immunities:** None.

**Maximum adjustments:**

**Overdose symptoms:** None.

**Range of influence:** Imbiber.

**Resting time:** None.

**Side effects:** None.

**Used for:** Extreme coughing caused by chest-cold or pneumonia.

# Preparation

Cut one stem at the base from Coullip Herb and place it into a tea or hot water. Wait for 5 minutes (in which time it will release its juices into the drink) and drink the water. If it is not prepared in this fashion, it will only have half its potency. Discard the worthless Coullip stem.

Avoidance-roll: None.

Measurement per use: 1 mature Coullip stem.
