

Weapons, Enchanted:

Enchanted Weapons are weapons that have been spell-bound to cause more damage, and forge a stronger durability into the weapon. Enchanted will always have some ability or power that has been enchanted into it other than the rank of the weapon itself.

1

For every rank of a Enchanted Weapon the damage caused by that weapon will increase by 2.

2

Each rank of an enchanted weapon is worth an extra 750 white-gold.

Example

A Rank-1 Enchanted Weapon is worth 750 white-gold

A Rank-2 Enchanted Weapon is worth 1,500

A Rank-3 Enchanted Weapon is worth 2,250

A Rank-4 Enchanted Weapon is worth 3,000

This is only the rank value of a weapon . . . the weapon itself is valuable, as well as the enchantment(s) it holds.

Rank-0 does not mean this weapon is not magical; it is. Rank-0 will give no added damage caused by this weapon's bite, but it is both considered magical and enchanted.
