**Dislikes:** Bears (bears are immune to the chemical burning of the Burning Quills).

**Disposition:** This creature is a solitary dweller, mingling with its own kind. When encountered, this creature will attempt to sneak away, rather than face a confrontation.

**Fears:** Bears. If these creatures cannot successfully retreat from a bear, they will attempt to take it down together.

**Habitat:** Forest (all).

**Immunities:** Poisons (all types).

**Life-span:** 25 years.

**Likes:** Blackberries.

**Needs:** None.

**Note:** These creatures are collectors, and will have a 25% chance each of having 1-D4 random bird eggs. They take good care of these eggs, keeping them safe and warm, just as the mother they stole the eggs from. It is a mystery as to why these creatures steal and hatch the eggs of birds.

**Special Abilities: ShadowWalk:** This creature can pit its coordination vs the awareness of another creature, with a bonus of +50 (single roll check). If successful, the Quillyan can sneak, just as a person with thieving abilities. The most peculiar thing about this ability is that the Quillyan cannot be tracked by scent when performing ShadowWalk.

Special Defenses: Damage-Reduction: 2 from all forms of physical damages.

**Special Offenses: Burning Quills:** This creature can violently shed 1-D4 Burning Quills out in any direction per turn (during its normal attacks).

It will gain a +40 to strike any creature within 4 spaces (20'), even if creatures from directly behind.

A Burning Quill will cause but 1-D12 points of chemical burn damage, but this burning will last 1-D4 turns per quill the victim is hit by.

**Susceptibilities:** Bears terrify this creature to the point of causing a -15 on all defensive and offensive rolls.

**Weapon susceptibility:** Rank-0 (non-magical) weapon to harm.
