

Jumping (Horizontal):

Horizontal jumping is considered from a standing position. If a character is running, the distance will be doubled.

For a four-legged creatures (like a cat or dog) the initial distance of a standstill will be doubled (running, it will be at three times the distance). The distance a character or biped creature can leap, vs. heights not listed, will be strictly up to the of the G.M.

Note

From the standstill (flat-footed) position, the jump distance is considered as if using all/both feet. If less than all/both feet are used, the span will be cut down to one-half the normal distance.
